

# Abbey Scourmont

Reference

Modernisation

Place

Chimay, Belgium

Year

2020/2021

Project type  
**Renovation**

Renovation of 22 bathrooms so far

Client	Monks of Notre Dame
Principal contractor	SPIE -Project monitoring
Project monitoring	Olivier Huart
Architect	Pascale Leroy
Carpentry	Menuiserie Audain   David Audain

### Requirements

The new bathrooms of the abbey should be designed in a simple and at the same time modern way. Care should be taken to ensure that the shower areas are watertight, including the surface design.

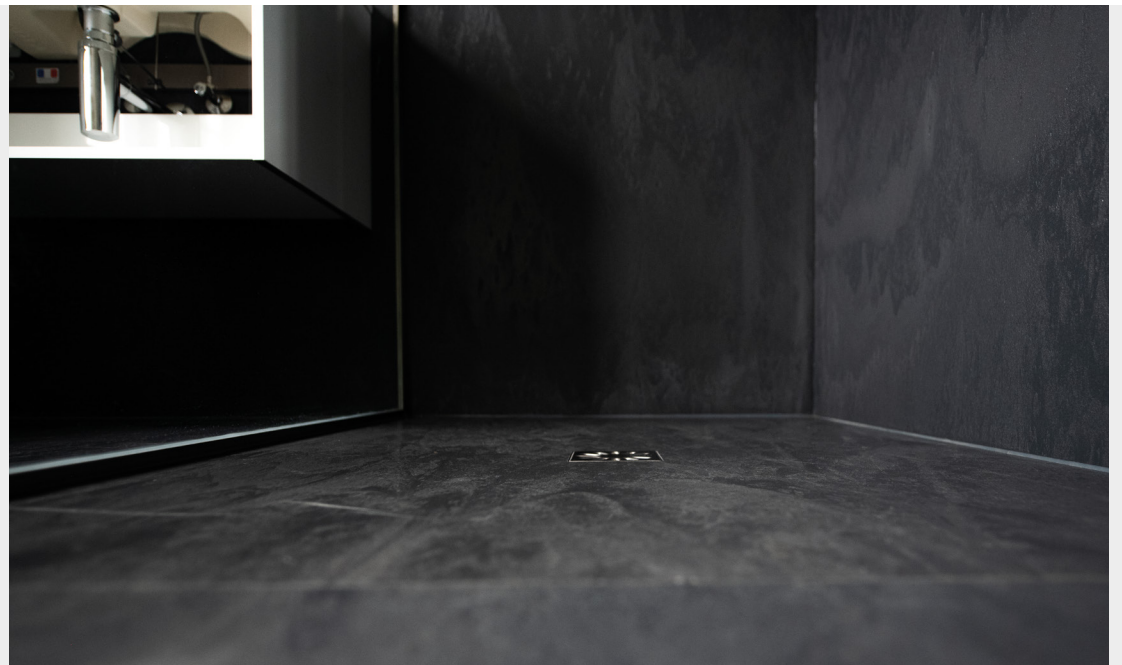

### Challenge

The entire floor of the bathroom consists of a wooden structure. The wedi sales team therefore recommended installing the wedi Fundo Primo, which is ideally suited for this project, as well as others. In combination with the ready-to-install surface wedi Fundo Top on the shower element and wedi Top Wall on the walls, all bathrooms are gradually completely renovated. This creates a 100% waterproof system solution.

### Brief description

Built in 1850, the Notre-Dame de Scourmont Abbey near Chimay is not a hotel in the classical sense, but a place for those who want to share a few days of solitude and the prayer of the monks.

Products used

## Base products

- wedi building board
- wedi Top Wall
- wedi Fundo Primo shower element
- wedi Fundo Top
- wedi Fundo drain-substructure element
- wedi 610 adhesive sealant
- wedi Tools sealing tape
