Customer

Juriëns Noord

Location

De Schiphorst, Holland

Year

2016

Project type
New build

5 new rooms were created on the top floor of the building. The client's requirements were, among other things, flush-to-floor showers and a waterproof design for the shower walls.

Since there was not a generous amount of space available for the installation depth, they opted for Fundo Plano Linea.

Client Juriëns Noord

Brief description

The former manor of Havixhorst is located on an estate in Meppel in the Dutch province of Drenthe on the north side of the river Reest. The original manor house is today a hotel and restaurant. Drenthe was originally inhabited by farmers.

The manor originates from the 17th century and was occupied by the De Vos van Steenwijk noble family until 1939. In 1982, partially supported by the Drenthe regional association, renovation by the director Jos A. C. Wijland for later use as a hotel and restaurant began.
